

Shoe Stretcher Instruction

EASY TO USE

① Insert the stretcher into your shoes. Let the heel block face down and the toe block touch the end of toe box.

② To lengthen, turn wheel knob clockwise. Heel block moves backwards to lean against heel counter. Once snuged, turn 2-3 more times.

③ To widen, turn the hook handle clockwise. The toe block opens to expand the shoes. Once snuged, turn 2-3 more times.

④ If you need extra widen for special needs, insert the bunion plugs in appropriate holes and press it to the end by palm.

⑤ If you want to raise instep area, insert the heightening pads between the vamp and stretcher block.

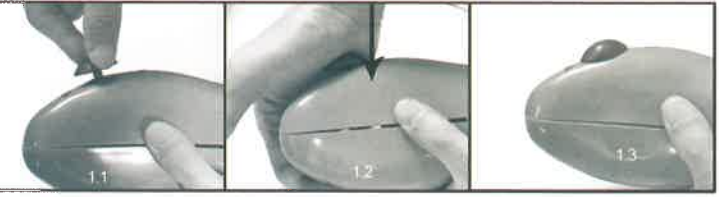

⑥ Leave the stretcher in your shoe for more than 24 hours. Turn back to retract the block and pull out gently.

Warm Tip:

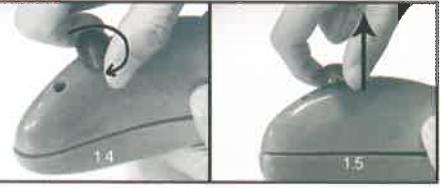

Do not over stretch the shoe, or your shoe may get damaged. Before widening your shoes, make sure you have well done step 2. only the heel block has tightly leaned against to the shoes back then you can widen it successfully, or the shoe stretcher may slide backwards while widening.

How to insert / take off the bunion plug

read the bunion head with your fingers, insert the bunion leg into appropriate holes and then press the button to its end by your palm. (see pics 1.1 & 1.2 & 1.3)

to take the bunion off: Turn the bunion clockwise with a little pull force to loosen it. Then pull out the bunion by your fingers. (see pics 1.4 & 1.5)

6. To uninstall the stretcher from the shoe, loosen stretcher first: simply anticlockwise rotate both hook handle and wheel knob. Then you can get the stretcher out of the shoe.

FAQ:

Q: Does the shoe stretcher stretch the top of toe area?

A: Our shoes stretcher can do 4 ways adjust, length, width, height, and special needs for you. There are 8 bunion plugs in the package. You can insert the plugs onto stretcher to widen the top toe area of your shoes according to your needs.

Q: Can these stretch sneakers?

A: YALUMO professional shoe stretchers fit sandals, flats, canvas shoes, sports shoes, high heels (<2.36 inches) and peep shoes. Our stretchers can be used to stretch tight shoes, blisters, bunions, calluses, corns, hammertoes, overlapping toes, toe pain, pinched toes.

Q: Will these stretch a pair of Skechers sneakers? my toe hits the end.

A: If your sneakers just a little bit shorter than your feet, I think it will do the work. but if your sneaker is much shorter than your feet, I don't think it will do the works.

Q: Can these be used to adjust the height of the toe box?

A: The shoe stretcher can be used to adjust the height of toe box because the 2 heighten pads are removable. You can place them close to toe box.

Q: Do you need to use stretch spray with this shoe stretcher?

A: No, you don't need. Just using the shoe stretcher to stretch the shoe. That's enough.

Q: Will this work to widen a clog style shoe with no back?

A: Yes, the stretcher can be used for that kind of shoe.

Q: How long should I leave the stretcher in leather flats?

A: It depends on your foot and comfort level you need. Also depends on the shoes, Leave the shoe stretchers in the shoes for no less than 24 hours and enjoy the peerless comfort

Q: How do you use the long silver color handle? Will it become rusted?

A: The long silver color handle is a shoe horn. Simply step half of your foot in the shoe first. Then hold the shoe horn and insert the wider side into shoe against heel part of the shoe. Note to fit the contact surface of shoe horn and heel. Last, step your foot on the shoe horn to get your whole foot slide into shoe. Then pull the handle out after finished. Refer the pic 2.0 to well understand how to use it. It is made of high quality stainless steel. Just keep it under cool and dry condition, it wont get rusted.

Q: Can I use these in a boot? Like doc martens?

A: It cant use in a boot like doc marten. Due to the upper height, the stretcher cant insert whole top supporting part into shoes deeply enough horizontally and may damage the shoes.
